

IDPH Approved Engineers Announced!

On January 1st of this year a new law went into effect in the State of Illinois that now requires all Engineers, Architects and Contractors to be pre-qualified by the Illinois Dept. of Public Health if they want to continue doing business in the commercial / public swimming pool market. The purpose of the law is to ensure that the drawings that are submitted for permit and the work that is being performed on the construction site are of the highest quality. Innovative Aquatic design, LLC (IAD) has been an active participant in the development of the procedures and forms that are now part of the process of becoming pre-qualified. IAD is currently one of only seven (7) Architects and Engineers that have been pre-qualified to date. Twenty one (21) Contractors have also been pre-qualified. Without this pre-qualification, the Health Dept. will begin rejecting permit applications and drawings by the end of this year. In addition, a permit will not be issued until the name of the pre-qualified pool contractor is provided to the Department. For more information regarding our pre-qualified status, please visit the IDPH web site [HERE](#).

ABOUT US

Innovative Aquatic Design, LLC is an aquatic engineering firm specializing in the design and engineering of recreational and competitive swimming pools, aquatic parks and water features. Utilizing the most current products and construction technologies, Innovative Aquatic Design, LLC provides state of the art designs in conjunction with Architects, Owners and Engineers for both new construction and renovation of existing facilities.
